GOLF GREENS | BOWLING GREENS

CLASSIC 80:20 is a traditional mix of fescue and bentgrass designed to deliver a consistent and balanced blend of these species when sowing out new fine-turf areas such as golf and bowling greens.

Table 1 shows the performance of the fescue cultivars in the BSPB Turfgrass Seed 2018. CLASSIC 80:20 contains both the top-rated Chewings (Barlineus - 20%) and slender creeping (Viktorka - 20%) varieties. Barking is the variety of browntop bentgrass in the mixture. It is an excellent European-bred cultivar with superior wear tolerance and winter colour. It also possesses very good tolerance to Microdochium Patch disease (Fusarium).

Cultivar	%	Mean Score	Rank	Shoot Density	Rank	Disease Resistance	Rank
VIKTORKA	20%	7.6	1	7.7	2	7.8	3
BARCROWN	20%	7.5	3	7.7	1	8.4	1
BARLINEUS	20%	8.2	1	8.3	1	7.4	3
BARGREEN II	20%	7.5	7	7.5	8	6.6	14

Table 1: Scoring and ranking of the fescue cultivars in CLASSIC 80:20 from Turfgrass Seed 2018 for golf greens use.

IN THE BAG

FORMERLY BAR 2
80% RED FESCUE
20% BROWNTOP BENTGRASS

20% VIKTORKA - Slender creeping red fescue
20% BARCROWN - Slender creeping red fescue
20% BARLINEUS - Chewings fescue
20% BARGREEN II - Chewings fescue
20% BARKING - Browntop bent

HOW TO USE IT

**CONSTRUCTION OF FREE- DRAINING
FINE-TURF AREAS; GOLF AND BOWLING
GREENS**

BARLINEUS #1 Chewings
VIKTORKA #1 slender
BARKING #4 bent

SOWING RATE - 20-30g per m²
OVERSOWING RATE - 15-25g per m²
SOWING DEPTH - Rootzone contact
MOWING HEIGHT - down to 4mm
