## FAIRWAYS, TEES, SEMI-ROUGHS

FAIRWAY RYE is a mixture of five grass species and sub-species, designed for the overseeding, divoting or construction of a balanced blend of medium-fine turf across a range of soil types.

The driver of the mixture is 30% Barcristalla perennial ryegrass. Barcristalla is a medium-fine ryegrass with excellent wear tolerance and superior colour. As an average of tables L1 (lawn) and S1 (sport) in BSPB Turfgrass Seed 2018, it is ranked #7 of all available cultivars.

The red fescue cultivars in the mix are all consistent performers, and are all ranked highly in the BSPB Turfgrass Seed 2018. Of particular note is the outstanding red thread tolerance of Barpearl and Barswing (both ranked #2 in their respective tables), an important factor in fairways under low nutrition.
