BOURNE
AMENITY

BSPB Turfgrass Seed 2018 data supports the Cropvle Research. Barcristalla and Barorlando are ranked #6 and #10, respectively, for mean performance under wear and #1 and #2 for mean colour (in the top-60 varieties).

Figure 2 illustrates this point. The two yellow dots are Barcristalla and Barorlando; both exhibit an excellent combination of colour and performance.

Baribro is a Regenerating Perennial Ryegrass (RPR) that produces stolons as it establishes and grows.

Figure 3 shows a Barlibro plant grown for a single seed at 15 months old. The stolons and new secondary branches of growth can be seen clearly. The lateral growth habit results in fast establishment between seeding lines and unparalleled capacity for recovery after and during wear.

IN THE BAG

100% PERENNIAL RYEGRASS

40% BARCRISTALLA - Perennial ryegrass

30% BARLIBRO - RPR perennial ryegrass

30% BARORLANDO - Perennial ryegrass

USAGE

Renovation and/or construction of elite winter sports pitches

KEY POINTS

Mixture formulated from dedicated UK Cropvle wear trials with objective DIA scoring; wear tolerance with other benefits for stadia. Barlibro RPR delivers fast establishment and unparalleled capacity for recovery from wear due to stoloniferous growth habit. Barcristalla and Barorlando give superior colour and Drechslera leaf spot tolerance.

HOW TO USE IT

SOWING RATE - 30-50g per m²

OVERSOWING RATE - 15-30g per m²

SOWING DEPTH - 12-15mm

MOWING HEIGHT - down to 18mm
