WINTER SPORTS, POLO & HORSE RACING

SMOOTH SPORT is a mixture of perennial ryegrass and smooth-stalked meadowgrass for the construction of winter sports pitches and equestrian surfaces.

It is recommended to allow at least three months for the smooth-stalked meadowgrass to establish.

The mixture is formulated primarily on performance in the BSPB Turfgrass Seed 2018; specifically, Tables S1 and S2 under sports wear simulation.

All three cultivars are ranked in the top-10 of their respective tables, and the blend has an outstanding Mean score of 7.59.

Eurosport and Barorlando are both highly rated in BSPB Turfgrass Seed 2018 Table S1 (7.8 & 7.6) whilst Bariris is highly rated in BSPB Turfgrass Seed 2018 Table S2 (7.1)

IN THE BAG

FORMERLY BAR 8

80% PERENNIAL RYEGRASS

20% SMOOTH-STALKED MEADOWGRASS

40% BARORLANDO - Perennial ryegrass

40% EUROSPORT - Perennial ryegrass

20% BARIRIS - Smooth-stalked meadowgrass

USAGE

Construction of winter sports pitches with long establishment window

KEY POINTS

Eurosport and Barorlando highly rated in BSPB Turfgrass Seed 2018 Table S1 (7.8 & 7.6)

Bariris highly rated in BSPB Turfgrass Seed 2018 Table S2 (7.1)

HOW TO USE IT

SOWING RATE - 30-50g per m²

OVERSOWING RATE - 15-30g per m²

SOWING DEPTH - 10-15mm

MOWING HEIGHT - Down to 15mm
