SOS is designed to give the fastest possible germination, establishment and growth for emergency repair or divoting sports turf and racecourses.

Barterra is the latest generation amenity annual ryegrass that will germinate at temperatures as low as 3.5°C, making it the ideal tool to maintain grass cover throughout the winter. Barenbrug research shows that amenity annual ryegrasses germinate more quickly and at lower temperatures than perennial ryegrass, including tetraploid varieties.

Bardorado is partnered with Barterra to give a longer-term solution within the mix as it is a perennial ryegrass with good performance characteristics, wear tolerance and disease tolerance. It is specifically chosen, as trials have proven that Bardorado germinates particularly well at low temperatures for a perennial ryegrass (down to 5°C, and quickly at 7-10°C).

IN THE BAG

50% PERENNIAL RYEGRASS

50% ANNUAL RYEGRASS

50% BARTERRA - Annual ryegrass

50% BARDORADO - Perennial ryegrass

USAGE

Overseeding and repair of sports turf and racecourses in cool

KEY POINTS

Barterra annual ryegrass germinates, establish and grows faster than perennial ryegrasses. Bardorado offers very fast cool temperature germination for a perennial and provides a long-term solution in the mix.

HOW TO USE IT

OVERSOWING RATE - 20-40g per m²

SOWING RATE - 30-40g per m²

SOWING DEPTH - 4-8mm

MOWING HEIGHT - Down to 20mm
