

# e12

rapid repair  
& winter  
establishment

**BOURNE**  
AMENITY

## The fastest germination time. The lowest temperature germination.

Rapid germination for emergency repairs and low temperature germination for winter use. In trials the annual ryegrass has germinated at temperatures as low as 3.5°C.

### Overview:

- Annual ryegrass Barterra can germinate in 3-5 days in normal temperatures
- Ideal for repairing winter sports pitches
- Double, tetraploid ryegrass is broad-leafed for increased visual cover
- Good red thread tolerance
- Strong establishment
- Very hard wearing

### Areas of use:

- Areas requiring rapid repair or establishment
- Extremely worn/damaged areas
- Football goal areas
- Public open spaces
- Urban areas
- Parks
- Lawns

## IN THE BAG

50% **Double** - Tetraploid perennial ryegrass

50% **Barterra** - Annual ryegrass

## HOW TO USE IT

**Pack Size** - 20kg

**Sowing rate** - 30-40g/m<sup>2</sup>

**Overseeding rate** - 20-40g/m<sup>2</sup>

**Cutting Height** - Down to 20mm
