

## Dark green turf. 365 days a year.

Formulated to create a year-round dark green turf. The varieties selected are ones which have a naturally occurring dark green appearance, the effect is a striking dark green surface. As well as having an excellent appearance, the mixture produces a very strong and durable turf. The inclusion of perennial ryegrass gives excellent wear tolerance, whilst the fescue species give density whilst adding good levels of drought tolerance.

### Overview:

- Creates a striking, dark green turf
- Formulated with varieties which have a naturally dark green colour
- Fast to establish
- Very good levels of wear tolerance due to inclusion of perennial ryegrass
- Good levels of drought tolerance due to inclusion of fescue species
