

100% RYEGRASS. GREAT WEAR TOLERANCE AND SPEED OF ESTABLISHMENT.

Designed for establishing and renovating sports turf surfaces and areas subjected to extreme levels of wear. The varieties used in the mixture are ones that have been trialled by the STRI for use in both winter sports and summer sports situations (Tables S1 and L1), making it an excellent all-round performer. Contains a blend of 100% perennial ryegrass which provides rapid germination as well as superior levels of wear tolerance.

Overview:

- 100% perennial ryegrass for exceptional durability
- Rapid germination
- Excellent recovery from wear
- Cost effective option for high wear areas
- All seed for this mixture is grown in the UK

Areas of use:

- Winter Sports (football, rugby, hockey)
- Summer Sports (cricket, tennis)
- Horse gallops
- School playing fields
- Local authority playing fields and parks
- Public open spaces
- Showgrounds
